

Guide to Interior Stone

What makes Stoneworld the best partner in natural stone?

When you dive into the world of interior flooring it can quickly feel like a maze. That's why Stoneworld want to help you specify the right stone for your customer. We support architects with personalised solutions for their projects – both in products and expert advice. From bespoke staircases to 7-ton statues, we can be a partner in achieving your unique ideas and your client's vision.

Experts in bespoke design

Our on-site masonry workshop is equipped with the latest technology to offer all your architectural solutions. Get inspired by our innovative work.

Avonbridge Limestone

STONEWORLD

Everything you need in stone

Unique Flooring

Stoneworld provide an extensive range of natural stone interior flooring, with styles, colours and finishes to suit any project. It is a durable, timeless and the original sustainable material for tiling projects.

Residential or commercial, Stoneworld can advise you on slip resistance, suitability and maintenance. We also provide alternatives to natural stone flooring such as porcelain flooring and wood flooring.

Although not a natural stone, porcelain flooring is becoming increasingly popular. Porcelain allows a very realistic alternative to natural stone, concrete, wood and marble. Porcelain tiles are very hard-wearing, low maintenance, and an excellent alternative to natural stone.

This beautiful floor was created using La Roche Limestone, featuring a Spanish Black Marble Cabochon. We achieved the pattern using our Water Jet Cutter, to precision cut each tile to the correct shape.

Moleanos Limestone

Staircases

Stoneworld are able to produce the most unique staircases. Once your staircase design has been formed from poured concrete, we can create a precision cut stone cladding, making a stunning architectural centrepiece for your customer's project. We template the proposed step treads and risers using our digital scanner to ensure precision and a perfectly fitted staircase, we use the water jet cutter in our masonry workshop to fabricate individual pieces. We make individual pieces in the masonry factory using the water jet cutter for accuracy. This ensures precision and a perfectly fitted staircase.

These Moleanos step treads are finished with a bullnosed edge. The bottom step has a curved and bullnosed edge to make a statement.

Bespoke Flooring Solutions

At Stoneworld we can produce your made to measure tiles or steps from solid stone with ease. Our onsite masonry shop has the latest machinery available for precision cutting and finishing.

To match the contemporary, curved log burner, Stoneworld created a curved stone hearth in porcelain.

Pool flooring

Stoneworld have a wide range of natural stone and porcelain pool copings, as well as bespoke copings, corners, roman ends and more. We can help you spec for residential and commercial projects. The possibilities are endless.

Stoneworld cut bespoke curved copings for the spa, creating an accurate curve for the circular design. Our digital mason digitally templated the project on-site. With the drawing, our high-tech team created all the bespoke pieces with the water jet cutter and bullnosed the edges by hand in our workshop. The White Mint Honed Sandstone was specified for this commercial project.
